Professional Summary

Aspiring Data Analyst and Machine Learning Developer skilled in Python, SQL, Tableau, and machine learning. Experienced in building AI-powered applications, predictive models, and dashboards.

Education

IILM University, Greater Noida

Bachelor of Technology in Computer Science & Engineering | CGPA: 7.67

2023-2027(Expected)

St. Xavier's School, Bhiwadi

Senior Secondary (CBSE): 84%

2021-2022

Matriculation (CBSE): 81%

2019-2020

Work Experience

Business Analyst Intern | Bharti Airtel, Gurugram

Jun 2026 - Aug 2026

- Built an AI-powered Telecom Churn Analytics Agent using Llama 3, Qwen 2.5, and Phi-3 Mini, converting natural language telecom queries into SQL and executive business reports for 30K customer records.
- Integrated OpenStreetMap (North India) and local GIS APIs to deliver location-aware churn insights using place names or latitude/longitude coordinates.
- Developing a multi-agent Telecom Marketing AI Copilot for campaign planning, audience segmentation, geospatial analytics, and recommendation generation on 20K telecom customer data.

Marketing Trainee | Bharti Airtel, Gurugram

Jun 2025 - Aug 2025

- Analyzed OTT non-utilization patterns among 21L+ prepaid users using SQL and Excel to identify customer behavior patterns and engagement trends
- Designed and evaluated A/B-tested marketing campaigns across TG/CG models
- Achieved a 1.01% positive delta in recharge conversion through a ₹49 top-up campaign

Projects

SynaptiQ – AI-Powered Multi-Model Intelligence Platform, [GitHub](#) | [Live Demo](#)

- Developed a multi-model AI platform integrating classification, recommendation, and predictive analytics systems
- Built ML pipelines using TensorFlow, Scikit-learn, Pandas, and NumPy for real-time inference
- Implemented CNN, KNN, and Random Forest models achieving 92–97% performance metrics

Geospatial Customer Behavior Analytics for Early-Career Youth Segmentation | Bharti Airtel

- Developed a scalable PySpark pipeline to process 6M+ telecom records, implementing geospatial mapping using 1 km spatial indexing and Haversine distance across Bengaluru.
- Built a behavioral segmentation framework to identify users transitioning from college to their first job using mobility and digital usage patterns. Engineered PySpark ETL and geospatial feature pipelines to support large-scale customer segmentation and marketing analytics.

Technical Skills

Languages & Databases: Python, SQL, C | MySQL, PostgreSQL, SQLite

Big Data & AI: PySpark, Pandas, NumPy, Scikit-learn, LangChain, Ollama, Llama 3, Qwen 2.5, Phi-3 Mini, Prompt Engineering, Multi-Agent AI Systems

Data Analytics & Geospatial: EDA, Tableau, OpenStreetMap (OSM), Geospatial Analytics, Haversine Distance, Spatial Indexing

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Hugging Face, Excel, Cursor

Achievements & Certifications

- AWS Academy Graduate – Generative AI Foundations – AWS
- BCG Data Science Job Simulation – Forage
- Introduction to SQL for BigQuery and Cloud SQL – Google Cloud
- Built and published interactive Tableau dashboards on [Tableau Public](#)
- Developed a Natural Language → SQL → Business Report pipeline for telecom analytics using local LLMs.
