

GAURAV UPADHYAY

Analytics & AI | Python | SQL | Generative AI | Data Science

+91 8287742146 | gauravupadhyay3350@gmail.com | [Linkedin](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

Computer Science Engineering student specializing in Data Science, experienced in data analytics, customer segmentation, campaign analysis, and large-scale data processing. Skilled in Python, SQL, PySpark, Tableau, Excel, LLMs, and machine learning, with experience building AI-enabled solutions.

Education

IILM University, Greater Noida

Bachelor of Technology in Computer Science & Engineering | CGPA: 7.67 **2023-2027(Expected)**

St. Xavier's School, Bhiwadi

Senior Secondary (CBSE): 83.4% **2021-2022**

Matriculation (CBSE): 82.66% **2019-2020**

Work Experience

Data Analytics Intern | Bharti Airtel, Gurugram

Jun 2026 - Aug 2026

- Built a telecom analytics solution using Python and SQL to convert natural-language business queries into structured analysis and reports across 30K premium customer records.
- Integrated OpenStreetMap and GIS data for location-based customer analysis using place names and latitude/longitude coordinates.
- Developed an AI-powered telecom analytics copilot for campaign planning, customer segmentation, geospatial analysis, and recommendations across 20K customer records.

Marketing Trainee | Bharti Airtel, Gurugram

Jun 2025 - Aug 2025

- Analyzed OTT non-utilization patterns among 21L+ prepaid users using SQL and Excel to identify customer behavior and engagement trends.
- Designed and evaluated A/B-tested marketing campaigns using TG/CG models to measure campaign performance.
- Achieved a 1.01% positive conversion delta through a ₹49 top-up campaign.

Projects

Geospatial Customer Behavior Analytics for Early-Career Youth Segmentation | Bharti Airtel | [Link](#)

- Developed a scalable PySpark ETL pipeline to process 6M+ telecom records, performing geospatial analysis using 1 km spatial indexing and Haversine distance across Bengaluru.
- Engineered behavioral and geospatial features to analyze mobility and digital-usage patterns and support customer segmentation.

SynaptiQ – AI-Powered Multi-Model Intelligence Platform, [GitHub](#) | [Live Demo](#)

- Developed a multi-model AI platform integrating classification, recommendation, and predictive analytics systems
- Built ML pipelines using TensorFlow, Scikit-learn, Pandas, and NumPy for real-time inference
- Implemented CNN, KNN, and Random Forest models achieving 92–97% performance metrics

Technical Skills

- Data Analytics:** SQL, Python, Excel, Pandas, NumPy, EDA, Data Cleaning, Data Validation
- Visualization:** Tableau
- Big Data & ETL:** PySpark, ETL, Large-Scale Data Processing
- Databases:** MySQL, PostgreSQL, SQLite
- AI, GenAI & Machine Learning:** LLMs, Generative AI, LangChain, Ollama, Scikit-learn, TensorFlow
- Geospatial:** OpenStreetMap, Haversine Distance, Spatial Indexing
- Tools:** Git, GitHub, Jupyter, VS Code

Achievements & Certifications

- Microsoft Learn – AI, Generative AI, NLP & Speech Badges | 2026 [Microsoft Learn Profile](#)
- Built a Natural Language → SQL → Business Report pipeline using local LLMs. | July 2026 [GitHub](#)
- Built interactive Tableau dashboards on Tableau Public. [Tableau Public](#)
- AWS Academy Graduate – Generative AI Foundations – AWS | June 2025
- Introduction to SQL for BigQuery and Cloud SQL – Google Cloud | June 2025
